

Livestock/Platform Scales

Platforms & Group Livestock Scales

10' x 30' Platform Module

A 10' x 30' Platform Module combined with an 8' x 10' Portable Platform provide the grain producer an accurate and economical farm management tool. Build the Platform Scale length of your choice with 10' x 30' platform modules, or add to your existing portable platform scale with a 10' x 30' module to make a complete semi scale.

Group Livestock

Central City Scale Inc. Livestock Scales are a fast, economical method to weigh livestock. We offer many different sizes of group weighing: 8' x 20', 8' x 16', 6' x 14' and 8' x 10'. The scale system accuracy is 99.75% without animal movement, and 99.5% accuracy with movement. Pictured is a 6' X 14' Model.

1. The **915** is the best indicator for split weight calculation, compatible with a thermal printer (3).
2. **Agrimatics** is a mobile app that adds up weight loads. It cannot be used with the split weigh feature.
3. The **Thermal Printer** prints out a gross, tare, and net weight to assist in record keeping, when used in conjunction with the 915 indicator (1).
4. The **2060 Indicator** will also handle split weighing with USB data transfer capability. (Available soon)

1. Model 915-Can produce Gross, Tare, and Net weights.

2. Agrimatics Libra

3. Thermal Printer- No more need for ink ribbons. The print is burned into the paper.

4. The Model 2060 will have the capability to split weigh multiple platforms with software (coming soon).

Typical Dimensions are 24" L X 6" H X 1" W (other sizes available)

The Portable Platform Scale is an economical solution to weigh truck axles, single or tandem. Two weights are required for a straight truck, three weights for a semi-truck. The scale comes in multiple sizes, the most common is 8' x 10' x 7" tall.

Small Platform Scales can be easily built to meet any custom need. (5k -10K Cap.)

Seed Tender Scale Systems maximize seed handling efficiency in the field.

Retro-Fit Scales Central City Scale can retro-fit any make or model of Granger-Meyer equipment with a remote scale system.

Feed Cart Scales come in handy when your custom feeding program calls for extreme accuracy. Available with a rechargeable battery power pack and the Model S-200 or Model G40M Indicator.

20" x 50" Hog Scales are used for weighing single small animals. Single animal hog scales are available with the S-200 or G40M Indicators and two Avery Weigh-Tronix Alley Weigh Bars™

In the instances where scale kits are not offered for your implement, our experienced scale associates are available to assist you in **customizing** a kit that is right for you.

Cake Feeder Kit (5k)

Universal Kit (30K)
