

3' x 8' Portable Livestock Scale

The 3' x 8' livestock scale for weighing individual animals. This scale system's accuracy is 99.75%. In practical weighing applications with animal movement, the system is 99.5%

The 3' x 8' comes with a Model 640M indicator. It has a capture mode to lock in on weight readings even if animals are in motion. Slide gates provide ease of use and safety for operator. The non-slip top provides great traction. 6'6" head clearance with robust reinforced square tubing paneling. 20" high solid sheet metal surrounds base of paneling. The scale comes with 110 volt AC power or 12 volt DC power. The Model 640M Indicator can be interfaced with a printer. You can also switch out the 640M Indicator for any of the Tru-Test brand or Ti-500 brand indicators for extensive record keeping via computer or app.
