

640m Indicator

ccscales.com
800.582.3175

The Model 640M is a "Miniature" general purpose indicator which provides simple, yet accurate weighing used on mixers, grain carts, livestock scales, feed bins, weigh carts and many more applications.

The compact indicator design makes it ideal for places like truck and tractor cabs where space is limited (size: 5.5"H x 7.25"W x 3.25" D).

Simple Operation

- ZERO key zeros the scale, PRINT key transfers weight data to printer.

Gross/Tare/Net

- G/N key allows viewing of either gross or net weights. TARE key is useful for temporary "zeroing" of the scale.

Motion Filtering

- Enhanced dual "harmonizer" filtering settles down weight display for easy viewing. Ideal for filtering excess motion on mixers and livestock applications.

Memory Accumulators

- 100 six-character alpha-numeric accumulator channels.
