After 40 years of service on all brands, we build the best.

Leave it to the farm scale specialists to handle all your weighing needs

Mini-Scales

Compact in size yet mighty handy in special applications, our mini-scales have found a home in today's farmers markets, veterinary clinics, landscape designers, and manufacturing facilities where precision accuracy is necessary. From Container or bushel basket to newborn animals, the mini-scale is a very low profile, electronic scale. The aluminum 20" x 50" platform weighs only 35 pounds and has adjustable leveling feet for convenience. Custom sizes are also available. All scales are complete with state-of-the-art mobile apps and indicators that are easily shipped via UPS.

Portable and Stationary Individual Animal Scales

Simply pull the locking pin and hand winch to proper tension to allow wheels and axle frame to drop into position and convert our chute scales into an easy pulling on-site scale system. 3' x 8' scale with sliding enter-and-exit doors allow easy one-man operation. Adjustable tongue hitch for easy drop pin attaching. One or two pound increments—working capacity 5000 lb. Optional headgate.

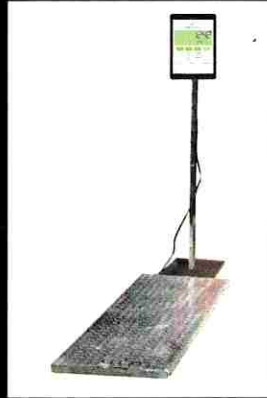

Easy hand winch raises or lowers unit into place

Livestock Scales

The livestock scale is available in three standard sizes. Our quality features when compared to our prices are the best in the market. Choice of 8' x 10' (also available in a wheel kit, holds 8-10 head), 8' x 16' (12-15 head), 8' x 20' (18-22 head). Capacities listed are based on 1,000 lb. cattle. Each unit is self-contained and can be moved to any location. Deck dimensions can be altered on customer request.

Locking pin holds unit in stable position when transporting

Small Animal Scales

Weigh hogs, sheep, llamas, alpacas, goats, dogs, etc. on a 20" x 50" alleyweigh for sorting and monitoring. Optional crates with easy catch and release latches allow complete, calm control from entry to exit. Also available are small animal group scales of 4' x 6', 3' x 8', and 6' x 10'. Several models of digital indicators with multiple features are available. 4-H groups all over the United States prefer these scales.

Cake Feeder/ Multi-Purpose Scales

Up to 5,000 lb. system for around the farm ideas. Complete with compact readout. 12V or 110AC. Load cells act as bolt-on feet.

We can custom build to your requirements and sizes

Chute Scales

Our unique counter-sinking 10,000 lb. capacity weigh bar systems for cattle working chutes are designed to handle the heavier shock vibration handed out by your cattle. Central City Scale systems will function at temperatures -20 degrees. All digital indicators offer multiple levels of motion filtering and a capture mode. They also have interfacing capabilities to interface with iOS, Android, Mac and PC.

Feed Ration Management

Ration Management weighing systems for TMR mixers used in feeding beef cattle or dairy cows are available in a wide range of scale systems. Offering the simple low cost scales to the more sophisticated ration formulation models, to the ultimate ration management solutions with interfaces to several Feed Management software packages.

Forced Ejection Models

Model offers independent hydraulic control of cutting and spreading and forced ejection. The push gate is operated with a single cylinder, stabilized by guides to prevent mis-alignment. Load, transport, spread and level with hydraulic controlled push-out—with a good view of machine operations by the operator.

Grinder Mixer Scales

Weigh bars are supplied built into each axle and hitch, thereby making the equipment a mobile scale.

Scoreboard Remote Display

The 4" tall Scoreboard remote display features bright red LEDs to clearly show scale data in any lighting condition. The serial port interface and auto learn feature make connecting to an indicator a snap!

In-Cab Remote Display

The In-Cab Remote display is designed to remotely display the value of a scale indicator that is equipped with a radio transmitter.

For applications where you want to know the weight but don't want to get out of the cab, the In-Cab Remote fills the need.

Floor Scales

Indicator and scale are pre-calibrated at the factory and ready for service with no on-site installation required. Capacities: 5,000 lb. (48" x 48" x 3") or 10,000 lb. (60" x 60" x 3").

Seed Tender Scales

Seed tender scales are simple and easy to operate. These scales offer accuracy of 99.75%. They can provide recorded amount of seed used on last fill and review inventory of seed left in tender. Save time & fuel by weighing in the field. Can be installed on virtually any brand of seed tender.

Portable Platform Scales

Platform Scales for Any Weighing

Take the guesswork out of yield weight with our platform scale. You can measure either your bale processor or individual bale right in the field.

As more and more livestock are being transported to feed yards or direct to market with large semi-trailers, we continue to receive calls on our portable platform scales. The platform measures 8' 1/2" x 10' 8" with 50,000lb. capacity. Available with a choice of digital indicators to fit your operation. Options include: detachable ramps, removable livestock racks, indicator stand, wheels and axles (removable), ball hitch assembly, remote display and weatherproof indicator box with printer.

Platform Scales are available from 10' x 30' to 10' x 70' with capacities from 60,000 to 140,000 lb.

Build Your Own Scale

Update Your Old Conventional Scale with New Electronics

Order our plans for standard sizes, Indicators, power supplies, sensors and mounting brackets to fit your specs are also available.

Our Central City Scale team is ready to serve your needs.

Grain Cart Scale Kit

Libra Cart is a tablet and smartphone-based grain cart weighing and data management system. The Libra Cart hardware device mounts directly onto your grain cart and wirelessly communicates with the Libra app running on a compatible mobile device in your tractor cab. Libra Cart's patent pending technology automatically records the date, time, weight and GPS location of each grain cart unload, and provides load tracking from field to truck to destination. It's easy to set up and simple to use for operators of all ages and technological skill level. For maximum efficiency by recording and hauling at or near capacity without exceeding legal limits, update your gain cart weighing system with a grain cart kit.

Grain Cart Cloud Software

Cloud-connectivity unifies the system across your entire operation. Crop flow transactions can be emailed, or optionally stored securely in the cloud for access wherever you are.
