

Working Chute Scale

The chute weigh system is ideally suited for installation under a manual or hydraulic livestock squeeze chute or livestock scale. There are two different Chute Weigh system capacities at 5,000 lb or 10,000 lb. The ease of installation allows the system to be accurately weighed in just minutes. Installation can be portable or permanent depending on specific application.

Our Products

We offer many different levels to Cattle Working Chute weighing.

1. The Weigh-Tronix 640 Indicator which provides simple auto-lock accurate weighing along with a LED backlight display.
2. Tru-Test's Ezi Weigh 7 is a simple to use indicator. It has the capability to record information (VID) or (EID) tags. You can easily capture and analyze individual animal data.
3. The Tru-Test ID 5000 has a speedy Superdamp technology for weight lock. It stores up to 250,000 records in 250 weighing sessions. The ID 5000 tracks performance through calculating and visualizing an animal's weight gain. It can quickly transfer data using mobile and /or tablet device (Android or Apple) USB flash drive or computer (Windows).
4. The Tru-Test XR 5000 has a speedy Superdamp accurate weight lock. This indicator can store up to 1,000,000 records and 100 pieces of information per animal. It can sort animals into predefined groups based on weight or other criteria. It can also quickly transfer using mobile and /or tablet device (Android or Apple) USB flash drive or computer (Windows).

Also available with your choice of indicator is the 4 weigh bar installation in the corners of the chute. This method helps maintain a low profile if that is desired.
